hmr update /src/index.css (x2)

The screenshot shows a VS Code editor with the following tabs: Welcome.jsx, Transactions.sol, Transactions.jsx, and Services.jsx. The breadcrumb navigation indicates the current file is Services.jsx, located at client > src > components > Services.jsx. The code in Services.jsx is as follows:

```

11      justify-start items-start">
12        <h1 className="text-white text-3xl
13          sm:text-5xl py-2 text-gradient">
14          Services that we
15            <br />
16            continue to improve
17          </h1>
18        </div>
19      </div>
20
21      <div className="flex-1 flex flex-col
22        justify-start items-center" >
23
24      </div>
25    </div>
26  );
27
28  export default Services;

```

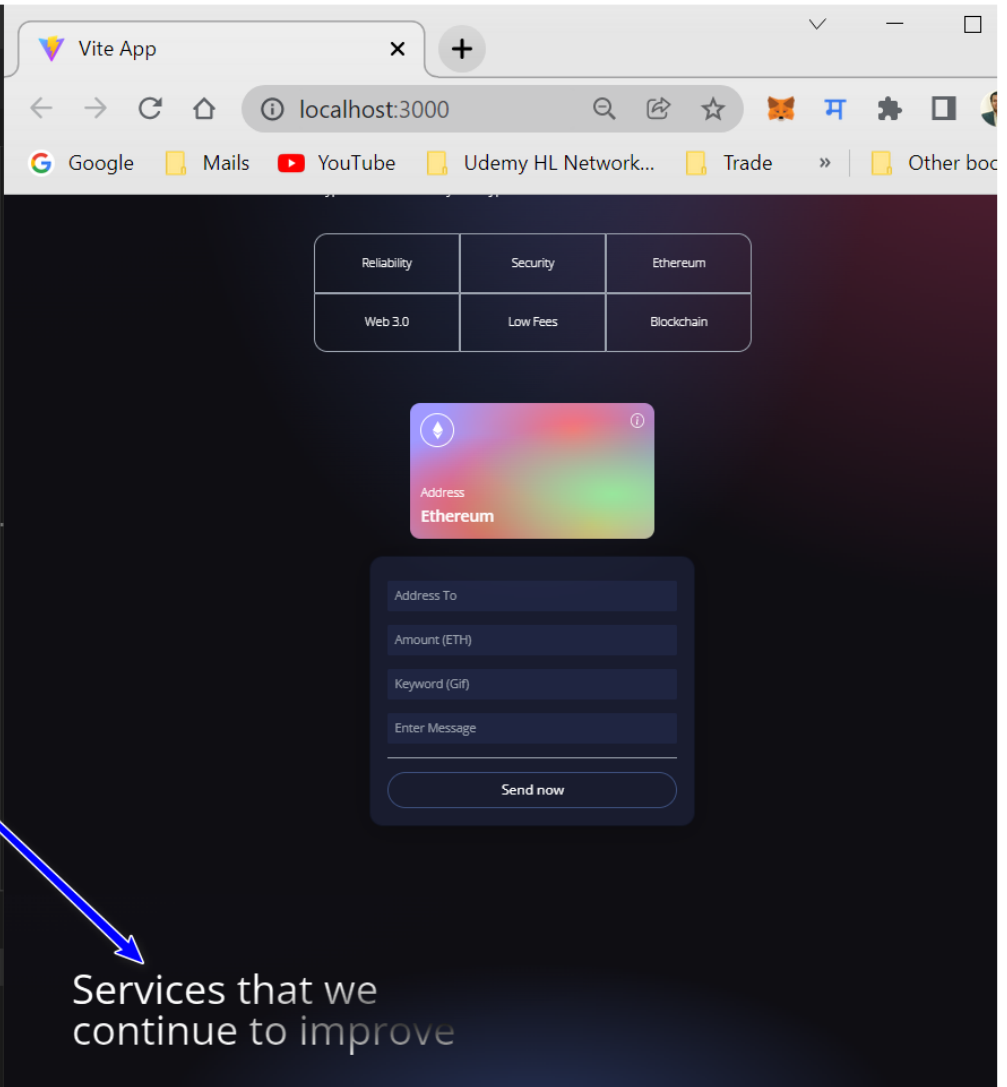

A blue arrow points to the `flex-col` class in the `flex-1 flex flex-col justify-start items-center` class name on line 21.

The bottom of the image shows the terminal with the following command:

```

5:52:36 pm [vite] hmr update /src/components/Services.jsx
hmr update /src/index.css (x3)

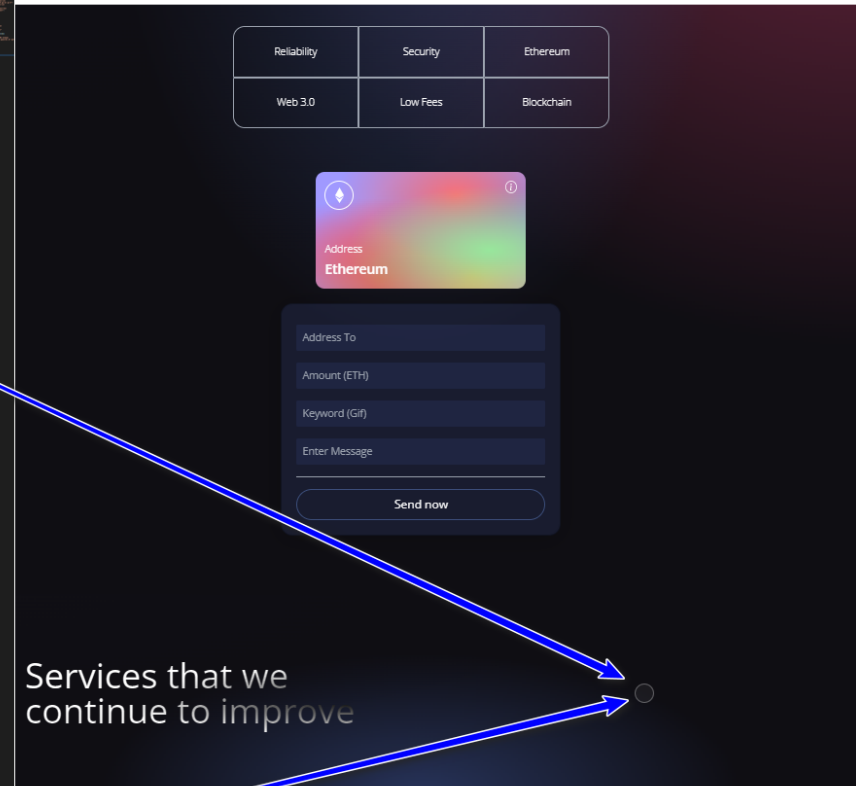

```

```
